

Carte du 20 décembre 1985

unexpected. Even me, who has begun to feel old three months ago. I feel sometimes the growth of moments of youth in me, like flowers under the snow.

Jerry is in ~~Paris~~ Laennec Hospital, 42 rue de Sévres, Paris 6. He is serene, smiling, but dying. The famous three specialists in Paris who take care of him hope still nevertheless for a remission due to their new "protocols". He still came from Paris to be with me during my operation, for three weeks, but is considerably weaker now. As for me, I make very slow but very sure, they tell me,

all good wishes for the season and all of 1986. particularly in May. It is nice for a child to be born in Spring, even in this disturbed world, and in any case his parents are his assets. You are not old, Paul, far from it, and when was it old, one knows that ~~young~~ youth has a way to be reborn many times, always

progress in my recovery. I think like you that the contact with earth ^{Birds and Fruit in Snow} ^{Japanese} ^{Kumashiro Yaku (1663-1772)} ^{Edo Period} ^{Bigelow Collection} ^{Museum of Fine Arts, Boston (11.5116)} makes for peace. I do not know if you have the little brown book Un homme d'acier which, with its predecessor hana, has us France completely replaced. The volume Comme l'eau qui coule where we seemed to feel that the 3 stories clashed with each other. I am sending it to you. Tell me if you have also the beautifully presented edition Bliss and Gospels, published last year?

all my love to both
Marguerite Laurence
